

All Zistos fiberscopes offer safe visual access into extremely tight spaces and can be used optically or to send an image to any WalkAbout™ monitor.

Fiberscope Features:

- Small diameter flexible probe provides visual access into areas that are otherwise difficult or impossible to reach
- Can be used optically (held directly to the eye) or as a video camera in conjunction with WalkAbout monitor
- Available with 2 or 4 way remote tip articulation
- Color or black and white camera
- Less expensive alternative to Videoscopes
- 1 meter length standard with custom lengths available
- Battery powered light source provides illumination
- Complete kit includes fiberscope, camera, camera adapter, camera cable, light source, guide tube and rugged carry case
- Available in NTSC or PAL video format

Fiberscope Models:

2-Way Articulating

6mm (.25") diameter x 1M (39") long

Range of +/- 120°

60° FOV (Field of View)

4-Way Articulating

8mm (.31") diameter x 1M (39") long

Range of +/- 100° left/right; 160° up, 130° down

55° FOV (Field of View)

Fiberscope Kits:

2-Way Articulating Fiberscope Kit

- 6mm (.25") diameter x 1M (39") long, 2-way articulating fiberscope
- Lithium battery powered light
- Fiberscope / borescope camera with camera lens adapter and camera cable
- Guide Tube (fits under doors with .37" clearance)
- Rugged carry case (19" x 16" x 6" each)

Models available

Camera	NTSC	PAL (Europe)
Color	FSK2	FSK2-P
BW	FSK2-BW	FSK2-BW-P

4-Way Articulating Fiberscope Kit

- 8mm (.31") diameter x 1M (39") long, 4 way articulating fiberscope
- Lithium battery powered light
- Fiberscope / borescope camera with camera lens adapter and camera cable
- Guide Tube (fits under doors with .37" clearance)
- Rugged carry case (19" x 16" x 6" each)

Models available

Camera	NTSC	PAL (Europe)
